

## Keeping your new screen clean

**Finally, a sure-fire process that results in 90% less time cleaning glass shower screens**

**Monaro Screens are pleased to be able to offer our customers the amazing new VITROglaze glass technology.**

The seemingly smooth surface of glass consists of microscopic ridges and valleys which creates a favourable environment for the build-up of contaminants such as soap scum, hard water deposits and grime.

In time the glass surface will visibly dull and become difficult to clean. This will result in high maintenance and premature replacement costs due to deterioration.

**VITROglaze** is a permanent nano-coating that fuses with the glass, and prevents the adhesion and build-up of contaminants onto the glass surface. It also provides water and oil repellent properties that will help reduce your cleaning by up to 90 percent.

Working similar to non-stick cookware, your glass becomes easier to clean, without the need of hard chemicals.

### **Cleaning your glass**

The warmer the water, the greater the surface tension and spotting, therefore shower doors require a little more maintenance than other applications like windows or glass balustrades.

Apart from **VITROglaze** glass treatment we also recommend the following steps to ensure your glass stays as bright and clean as the day it was installed.

- **Try to use a liquid body wash instead of soap.**
- **After every shower use the removable shower rose (if available) to rinse the glass and tiles of any left-over shampoo, body wash or soap.**
- **After every shower use a squeegee to remove excess water, preventing it drying and staining the glass. Monaro Screens have squeegees in stock.**
- **Once a week give the glass a good clean using non caustic cleaning agents. Make sure you read the product label before applying to your glass or metal frame.**

So when you order your new Monaro Shower Screen (or splashback), make sure you ask about the **VITROglaze** application.

## Setting up shower bases

**How to set up your new shower base:**

- We recommend using an angle fixed & wet sealed into the floor where possible.
- The angle should be the same colour as the shower screen frame/fittings. It should be left protruding at least 5mm after tiling.
- The protruding section should be taped up before wet sealing & tiling so it can be left nice & clean at the end.
- This method will ensure no water passes under tiles or through grout lines to the exterior of the shower base.
- Tell your wet sealer or tiler to contact us for more information. We stock most angles required.

## Which screen is right for me?

How to choose the correct shower screen for my bathroom

## PIVOT - Advantages

- Attractive looks with less vertical frames than sliding doors.
- Can give a larger opening than sliding doors.
- Less tracking or grooves to clean.
- No moving parts.
- "Captive" magnet gives a water resistant seal as well as holding door firmly closed.
- Water deflector on bottom of door reduces chances of water seepage.
- Very durable.
- Less expensive than **Semi** or **Frameless**.

## SLIDING - Advantages

- Works well in tight places – e.g. ensuites etc..
- Space-saving due to no opening doors that can swing open and come into contact with vanity, toilet, etc..
- Can open from corner.
- Less expensive than **Semi** or **Frameless** screens.

## PIVOT - Points to consider

- Opening door can intrude on available space – for instance, vanity, toilet or entry door.
- Door opens **OUT** only (**semi frameless** & **frameless** open both ways).

## SLIDING - Points to consider

- Little more difficult to clean due to track grooves & panel overlap.
- Vertical frame can be intrusive.
- Replacement of wheels/guides.
- More "fragile" than pivot doors.

### PIVOT SPECIFICATIONS

Minimum recommended clear opening of 400mm.

### SLIDING SPECIFICATIONS

**2 panel.** Minimum recommended front opening of 920 (gives Approx. 400 clear opening. W/2-60).

**3 panel.** Minimum recommended front opening of 765 (gives approx. 400 clear opening. W/3x2-110).

<b>Frame Colours</b>	Chrome, Satin & White only. White birch & barley available for pivot screens
<b>Glass types</b>	Clear, Ultra clear, Grey, Bronze, Green, Azure (blue), Matalux, Grey Matalux, Clear Vision Matalux, Satinlite, Desert Sands, Cathedral, Spotswood, Netfin, Glue Chip, Flemish, Roughcast & Seadrift.
<b>Turn around time</b>	Approximately 10 - 15 working days

## PIVOT - Advantages

- Looks – "Perimeter" frame only. No vertical frame where glass meets glass.
- Sense of space – non intrusive to bathroom.
- Easier to maintain – no tracking or grooves to clean.
- No moving parts to replace.
- Door opens both **in & out**.
- Water deflector on bottom of door reduces chances of water seepage.
- Modern and elegant look.
- Less expensive than **Frameless Screens**.

## PIVOT - Points to consider

- Opening door can intrude on available space in smaller compact areas. Doors have **no frame** to protect the glass from obstacles.
- Minimal water can seep through gaps. This will depend of course, on size of shower head, water pressure and enclosure design.
- Fewer glass selections as opposed to **Framed**.
- Cost more than "framed" screens.

### PIVOT SPECIFICATIONS

Minimum recommended clear opening of 400mm.

## SLIDING - Advantages

- Works well in tight places for example in ensuites etc..
- Looks – has a "perimeter" frame only. No vertical frame where glass meets glass resulting in a clean and modern design.
- Gives your bathroom or ensuite a sense of space. Doors are non intrusive into your bathroom.
- Less expensive than **Frameless Screens**.

## SLIDING - Points to consider

- Little more difficult to clean due to track and panel overlap.
- Replacement of wheels/guides.
- Fewer glass selections.
- Three panel not available.
- Cost more than **Framed** screens.

### SLIDING SPECIFICATIONS

**2 Panel only.** Min recommended front opening of 1050mm (gives approx. 400mm clear opening. W/2-125).

<b>Frame Colours</b>	Chrome, Satin & White only
<b>Glass types</b>	Clear, Ultra clear, Grey, Bronze, Green, Azure (blue), Matalux, Grey Matalux, Clear Vision Matalux, Satinlite & Desert Sands
<b>Turn around time</b>	Approximately 15 - 20 working days

## PIVOT - Advantages

- Great looks – **no frame**.
- Sense of space – non intrusive to bathroom.
- Easy to maintain – no tracking or grooves to clean.
- Door opens both **in & out**.
- Water deflector on bottom of door reduces chances of water seepage.
- Modern and elegant look.

## PIVOT - Points to consider

- Opening door can intrude on available space in smaller compact areas. Frameless doors have **no frame** to protect the glass from touching obstacles.
- Water can seep through gaps but is usually minimal. This will depend of course on size of shower head, water pressure and enclosure design.
- Costs more than **Semi Frameless** screens.
- Fewer glass selections.

### PIVOT SPECIFICATIONS

**(10mm glass).** 1, 2 or 3 panel front. Minimum recommended clear opening of 400mm.

## SLIDING - Advantages

- Works well in tight places for example in ensuites etc..
- Elegant looks with no frame. A very clean and modern design.
- Gives your bathroom or ensuite a sense of space. Doors are non intrusive into your bathroom.

## SLIDING - Points to consider

- Little more difficult to clean due to track and panel overlap.
- Fewer glass selections.
- Floor **must** be level.
- Costs more than **Semi Frameless** screens.

### SLIDING SPECIFICATIONS

**2 Panel Only. 12mm glass.** Minimum recommended front opening of 980mm (gives approx 400mm clear opening. W/2-90). Max width:1630mm.  
**3 panel not available.**

<b>Glass types</b>	Clear, Ultra clear, Grey, Bronze, Green, Matalux, Clear Vision Matalux, & Desert Sands.
<b>Turn around time</b>	Approximately 15 - 20 working days
